

HEAVY DUTY IMPAX SELF DRILL FASTENERS

DESCRIPTION:

Designed for metal to metal attachment of panels to steel purlins in medium and heavy gage applications.

- Precision cold forging and advanced heat-treating technology ensure superior strength and exceptional torsional strength during installation.
- Designed and engineered to have low driving and thread engagement torque and provide maximum clamp load.
- Mechanical zinc plated and coated with Silver “Sentri” for extended corrosion resistance.
- Epdm bonded washer is standard for a watertight seal. Available without washers.
- HD Impax fasteners can be painted to match your panel color.
- Also available in MAC and ZAC head styles for long life applications.
